Thermal Insulation Interior Fine Plaster

Seal Thermal-Plast NT is a fine lightweight high performance one-component ready-mix acrylic plaster having Energy saving THERMAL INSULATION properties and is easily applied to most interior wall surfaces. Owing to having intensive amount of ceramic micro-spheres of vacuum beads, Seal Thermal-Plast NT works as an insulation barrier within the building whereby in cold winter it prevents heat loss from inner to outer while entrapping the cool temperature of the air-conditioned rooms in summer.

Packaging size

Available in 4 litres and 18 litres (Pail)

Equipment

Spatula or spray application

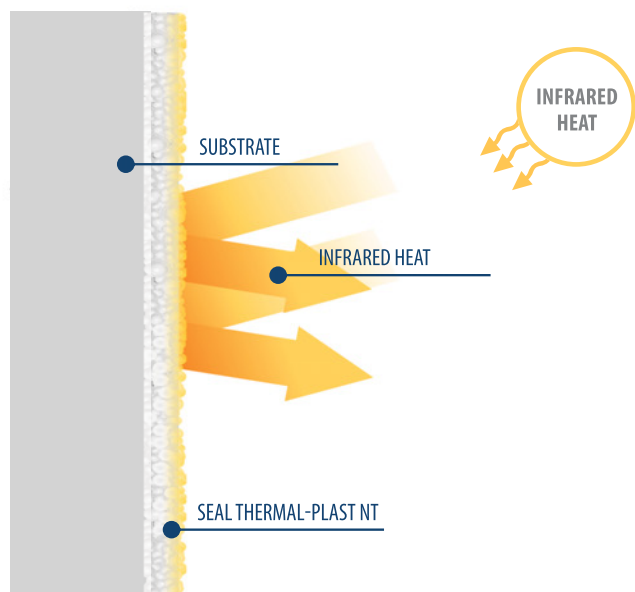

Colours

Off-white

Benefits

- Reduces internal temperatures
- Saves Energy
- Used as a decorative coating
- Class A - Fire Retardant
- Ready to use
- Non-toxic, water-based, low VOC
- Lighter than traditional plasters
- Provides breathable walls with its porous structure
- Environment friendly
- Good tensile strength
- Superior workability and application
- Excellent bonding to most substrates
- Lightweight

Seal Thermal-Plast NT Keep's buildings cooler in the summer and warmer in winter by reducing heat transfer through walls.

**Temperature reduction varies with environmental and application factors*
