Acrylic-based flexible waterproof coating

Seal Water Guard is a single component, elastomeric, acrylic waterproofing and protective coating. Having the waterproofing impervious and elongation properties in addition to the strong bonding on most substrates. Seal Water Guard upon curing forms a tough, flexible and durable coating which is resistant to UV and other weathering agents.

Water Guard shows an exceptional resistance to extreme weather conditions. It is non-toxic and environmental friendly.

Weatherproof and Waterproof

Seal Water Guard Product creates an excellent seamless waterproofing coating that would seal and waterproof any area in addition to reducing condensation and mold growth.

Benefits

- Single component, easy to apply
- Excellent UV resistance
- Can be used for interior and exterior applications
- Elastomeric- high crack bridging capability
- Non-toxic, water-based, low VOC
- Eliminates blistering, peeling & cracking
- Excellent bonding to most substrates
- Excellent breathability
- Water Resistance
- Very low maintenance/repair costs
- High solar reflective index
- Protects exposed concrete structures against carbonation.
- Environmentally friendly

Suitable Coating Surfaces

- Powder coated / galvanized metal roofs and walls
- Concrete roofs and walls
- Brick walls
- Masonry

Elastomeric & Thermal Shock

Seal Water Guard expands and contracts with changing weather conditions to accommodate structural movement and rapid changes in surface temperatures. This enables the coating to handle and reduce the continuous thermal stresses.
